Kim Fly Z1 3G: Yes 4G : No WiFi: Yes SIM Type: Dual SIM OS: Android 4.4.2 Kitkat Bluetooth: Yes Memory Card Slot: Yes Facebook: Yes Whatsapp: Yes Display: 3.5 LCD capacitive touch screen Resolution: 800 x 400 Pixels Colours: Black, Green Processor: Spreadtrum 7715 Processor Processor Type: 1.0Ghz RAM: 256MB Internal Storage: 2GB Back Camera : 5MP + Flashlight Free Silicon Back Cover Case Battery: 1200mAh This data includes installed apps and settings, your contacts and call history, device settings, photos, videos and text messages.Depending on the age of your phone, your backup might also include your Google contacts, Google calendar events, Gmail settings, wallpapers, display settings, date and time, Wi-Fi saved networks and passwords and settings and data for non-Google apps.Google is the main way Android users back up to PCs. The easiest way to backup involves just giving permission to Google to back up your data. MTN S730 Specs 3G: Yes 4G : No WiFi: Yes SIM Type: Dual SIM OS: Android 5.1 Lollipop Bluetooth: Yes Memory Card Slot: Yes Facebook: Yes Whatsapp: Yes Display: 4.0 True Touchscreen Resolution: 480 x 800 Pixels Colours: Black CPU: MTK6572 1.3Ghz Dual Core Processor Type: 1.3Ghz RAM: 512MB Internal Storage: 4GB Back Camera : 3.2MP Battery: 1500mAh #4. Your Device Manager also enables you to tell your phone when to perform backups and any specific apps you want to back up at regular intervals. Connect your phone to your PC with a USB cable. In this case, select the items you want to back up.The Manual Backup ProcessIf you want to back up items manually, such as pictures and videos, this is a simple process. #1. You may see a list of options for all the items you want to backup. (Stranger things have happened.) Although you could have located a missing device online before (via Android Device Manager), this new feature makes finding your precious belonging WAY easier. Once connected, your PC will recognize the phone and will show it as an external storage device. I am starting the list for cheapest Android Phones in Jumia 2016 with the lowest first starting at N10,000 and we would move our way up to the most expensive which would be at N20,000. Having all of your data safely tucked away on your computer gives you instant access to it on your PC as well as protects your info if something ever happens to your phone.Data to Back UpGenerally, the backup process will include all of the important info you want to save. Google just announced a feature that lets you pinpoint exactly where your phone is just by typing "Find My Phone" in the search bar. That's it. You may be able to find more information about this and similar content at piano.io Backing up your Android phone to your PC is just plain smart. And in the olden days of last week, if your phone was in the house and your ringer was off, you were out of luck. Type it, a map will appear and you'll know where on Earth your cell is hiding (with a few caveats; keep reading). Is your phone somewhere in your house? Double click on your phone, open the DCIM folder, and select the photos and videos you want to transfer over to the computer. Wait until they transfer, confirm they're on your computer and then you can disconnect your phone.Android Auto UpdatePart of managing your phone involves keeping apps up to date. Your phone's ringer will go off at full volume even if your sound is turned off, the perfect solution for when your phone somehow ends up underneath a couch pillow, in the laundry basket or in the dishwasher. There's a simple solution. Set your phone so that your apps update automatically when developers release changes. Got it? Open "Services" and then "Security." Check "Remotely locate this device" so the Device Manager protects your data if you lose your phone.By logging into your Android Device Manager, you can check Device Settings to know when you last backed up your phone. It starts N13,500 which is by far the most affordable android smartphone and it has decent specs, not too great also not too bad for an android phone of N13,500 and it was produced by Ringo Telecommunications Ltd. By opening Settings and then choosing Google and Backup, your phone will go through the backup process. If you've enabled location services on your Android and have Bluetooth turned on, the top search result should be where you need to go (approximately) to get your beloved piece of technology back in your hands.
